Profile

Computer Science student at Griffith University (Data Science and AI major) heading into cyber security and cloud. I'm studying for CompTIA Security+ and AWS Certified Cloud Practitioner, with hands-on practice on TryHackMe. I've spent three and a half years in a 5am-start outdoor role at Dreamworld, so I turn up early and work safely in a busy public venue. I'm looking for a part-time or full-time role in IT, cyber security or cloud from early 2027 while I keep studying part-time. Hybrid on the Gold Coast or in Brisbane, or remote.

Certifications

- **CompTIA Security+ (SY0-801)**: in progress, exam November 2026
- **AWS Certified Cloud Practitioner (CLF-C02)**: in progress, exam December 2026

Education

Bachelor of Computer Science, major in Data Science and Artificial Intelligence. Griffith University, Gold Coast. July 2024 to 2028 (expected), studying part-time, with credit for three first-year courses from Otago.

- GPA 6.40 out of 7
- Griffith Award for Academic Excellence, 2025
- High Distinctions in Computer Systems and Cyber Security, Deep Learning, Intelligent Systems, Object Oriented Programming and Discrete Structures
- Relevant study: distributed and concurrent programming (mutual exclusion, semaphores, message passing), robotics and computer vision, and machine learning and natural language processing in Python with PyTorch (RNNs, sequence-to-sequence models)

Bachelor of Science and Bachelor of Arts (Computer Science), University of Otago, Dunedin, New Zealand. Studied February to October 2021.

Hands-on practice

- **TryHackMe** (tryhackme.com/p/lukeae2001): Cyber Security 101 learning path, including Linux Fundamentals and Windows Fundamentals, with three sessions a week. Moving on to the SOC Level 1 path.

Work experience

Gardener, Dreamworld (Coast Entertainment), Gold Coast. April 2023 to present

- Look after gardens and grounds across a large theme park, on shifts that start at 5am
- Work safely around guests, rides and equipment, following site safety procedures
- Get the day's work done on time with the rest of the team, in all weather
- Three and a half years in the role, alongside part-time study since 2024

Skills

- **Programming:** Python, PyTorch
- **Systems:** Linux command line, Windows
- **Studying now:** security operations, threats and incident response (Security+ V8); AWS core services, IAM and the shared responsibility model (Cloud Practitioner)
